

# SETUP

## Instructions

1. Create a new folder
2. Do **npm init**
3. Install express
4. Create a file named **server.js**
5. Create a folder named **public** in the same directory as **server.js**
6. Create a file named **index.html** inside **public** folder
7. Execute **server.js** and hit the url from the browser **http://localhost:8081/**

## server.js

```
const express = require('express');
const app = express();

app.use(express.static("public"));

app.listen(8081, function () {
  console.log('ExpressJS is running on port 8081');
});
```

## index.html

```
<script src="https://unpkg.com/react@16/umd/react.development.js"
crossorigin></script>
<script src="https://unpkg.com/react-dom@16/umd/react-
dom.development.js" crossorigin></script>
<script src="https://unpkg.com/babel-standalone@6/babel.min.js">
</script>

<div id="root">
</div>

<script type="text/babel">
</script>
```
