MODULARISATION

INSTRUCTIONS

Create the admin.js and user.js in the same directory as Index.js

Hit the URLs

LOCALHOST:8081/ADMIN

LOCALHOST:8081/ADMIN/SETTING

LOCALHOST:8081/USER

LOCALHOST:8081/USER/SETTING

INDEX.JS

```
var express = require('express');
var app = express();

var admin = require('./admin');
var user = require('./user');

app.use("/admin",admin)

app.use("/user",user)

app.listen(8081, function () {
    console.log('ExpressJS is running on port 8081');
});
```

ADMIN.JS

```
var express = require('express');

var admin = express.Router();

admin.get('/', function (req, res) {
  res.send('<h1>Admin Home Page</h1>')
})

admin.get('/settings', function (req, res) {
  res.send("<h1>Admin's Settings Page</h1>")
})

module.exports = admin;
```

USER.JS

```
var express = require('express');

var user = express.Router();

user.get('/', function (req, res) {
  res.send('<h1>User Home Page</h1>')
})

user.get('/settings', function (req, res) {
  res.send("<h1>User's Settings Page</h1>")
})

module.exports = user;
```
